Blister machine for tablets and capsules ALU-30

DESCRIPTION

Automatic blister machine for packing tablets and gelatin capsules into pressed cells from aluminum foil, followed by sealing with thin aluminum foil from above. Used to form blisters of aluminum foil. The maximum width of the aluminum tape is 100 mm. Compact size and weight. Suitable for use in small-scale production and packaging of tablets and gelatin capsules. Productivity 1200 blisters per hour.

Maximum automation of all processes. It is made of stainless steel according to GMP standards. We provide detailed instructions for setting up this machine. Before sending the machine is tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. The price is indicated taking into account customs payments in Russia and delivery to the city of the client.

SPECIFICATIONS

Automatic blister machine for tablets and capsules "ALU-30"

Cutting frequency: 3-30 times per minute

Productivity: 1200 blisters per hour

The maximum size of blister forms: 80x100x20 mm

Standard travel range: 20-70 mm adjustable

Air pressure: 0,6-0,8 MPa

Aluminum thickness: 0.15-0.5 mm

Aluminum roll width: 100 mm

Aluminum foil thickness: 0.02-0.035 mm

Aluminum foil Roll width: 100 mm

Cooling of blister forms: flowing or circulating water

Noise level: <75 dBA

Power: 380V, 50 Hz, 4 kW

Packing size: 1600 mm x 550 mm x 1150 mm

Weight: 320 kg

Shipping Weight: 400 kg

ADDITIONAL INFORMATION

Contours of the future cells are formed from the rolled aluminum, then pills or gelatin capsules enter the cells from the storage hopper, after the thinner foil from the roll covers the finished blister, the clamping plate with the heater fixes the thin foil with the base of thicker foil. The cutting mechanism cuts off the contours of the finished blister. If the client wishes, a node for splitting the blister into fragments can be installed in the machine, longitudinal and transverse notches allow the blister to be divided into fragments without violating the integrity of the cells. Function of squeezing out the expiry date and batch number in the base configuration. The process is fully automated, all heating systems are controlled by electronic devices. Stamping of the expiration date and batch numbers by typing metal letters. Cooling forms are provided by flowing or recycled water. It is necessary to use a compressor with compressed air.

PRODUCTION TIME	30-40 DAYS
ESTIMATED DELIVERY TIME	30-40 DAYS

PRICE	13559,32 USD
VAT	2440,68 USD

VALUE 16000.00 USD

Payment is made in rubles to the account in Moscow at the rate of the RF Central Bank

OUR SERVICES FOR CLIENTS:

1) TRAINING TECHNOLOGY OF PRODUCTION OF BLISTERS.

All our customers who purchased equipment, we provide literature on the basics of packing tablets and gelatin capsules in blisters, as well as the use of packaging materials. We carry out consultations by phone and by correspondence, we help to solve arising difficulties at manufacture on our equipment. We supply spare parts and consumables. We provide services in the sale of used equipment.

2) WE COMPLETE MANUFACTURE BY BLISTER MACHINES.

We have a large assortment of automatic blister equipment for packing in blisters of tablets and capsules. At the request of the client we will select the optimal model of the equipment by the number of cells and the form of the finished package.

3) SPARE PARTS SUPPLY

We cooperate with manufacturers of automatic and semi-automatic blister machines and we are engaged in the supply of spare parts for any model of cars purchased in our company.
