Blister machine for tablets and capsules MN-14

DESCRIPTION

Automatic flat type blister machine is used for packing medical preparations of tablets and gelatin capsules, food products, parts of electrical devices in blister packaging made of PVC film and aluminum foil. The maximum blister size is 130x100 mm, the depth of the cells is 26 mm. Suitable for use in pharmaceutical manufacturing and packaging of tablets and gelatin capsules. Performance 4800 blisters per hour.

Maximum automation of all processes. It is made of stainless steel according to GMP standards. We provide detailed instructions for setting up this machine. Before sending the machine is tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. The price is indicated taking into account customs payments in Russia and delivery to the city of the client.

SPECIFICATIONS

Automatic flat type blister machine "MN-14"
 Punching frequency: 8-35 times per minute
 Productivity: 4800 blisters per hour (standard size 80x57 mm)
 Max. the area and depth of the blister: 130x100x26 mm
 Standard travel range: 20-120 mm
 Standard blister sizes: 80x57 mm, 80x35 mm, 95x65 mm, 105x42 mm, 105x55 mm
 (can be developed on customer's request)
 Air supply: 0,5-0,7 mPa, flow rate 0,15 m3 per minute
 Total power: 380 / 220V, 50Hz, 3.2 kW
 Motor power: 0,75 kW
 PVC film: 0,15-mm 0,5, roll width - 140 mm
 Aluminum foil: 0.02-mm 0.035, roll width-140 mm
 Dialectic paper: density of 50-100 grams / m2, roll width - 140 mm
 Mold cooling: flow or circulating water
 Size with packing: 2300x560x1410 mm
 Weight: 700 kg
 Shipping Weight: 800 kg

ADDITIONAL INFORMATION

From a roll of PVC envelope the machine molds cells that are filled with tablets or gelatin capsules (other products), then the machine, by pressing roll aluminum foil, welds it to a PVC envelope. Cutting out the stamp cuts out the finished blisters, and the waste is rolled up into a roll. This equipment is used for packaging medical products, food products, parts of electrical appliances. The blister machine is specially designed for use in hospital settings, laboratory institutes, for the production of health care products in medium and small pharmaceutical factories. This model is characterized by a compact body size, simple operation, multi-function, stroke length adjustment, durability. Cooling forms are provided by flowing or recycled water. It is necessary to use a compressor with compressed air.

PRODUCTION TIME **30-40 DAYS**
ESTIMATED DELIVERY TIME **30-40 DAYS**

PRICE **29661,02 USD**
VAT **5338,98 USD**

VALUE 35000.00 USD

Payment is made in rubles to the account in Moscow
 at the rate of the RF Central Bank

OUR SERVICES FOR CLIENTS:

1) TRAINING TECHNOLOGY OF PRODUCTION OF BLISTERS.

All our customers who purchased equipment, we provide literature on the basics of packing tablets and gelatin capsules in blisters, as well as the use of packaging materials. We carry out consultations by phone and by correspondence, we help to solve arising difficulties at manufacture on our equipment. We supply spare parts and consumables. We provide services in the sale of used equipment.

2) WE COMPLETE MANUFACTURE BY BLISTER MACHINES.

We have a large assortment of automatic blister equipment for packing in blisters of tablets and capsules. At the request of the client we will select the optimal model of the equipment by the number of cells and the form of the finished package.

3) SPARE PARTS SUPPLY

We cooperate with manufacturers of automatic and semi-automatic blister machines and we are engaged in the supply of spare parts for any model of cars purchased in our company.
