Analyzer for determining the degree of viscosity of gelatin ND-02

DESCRIPTION

Analyzer for determining the degree of viscosity of gelatin. The device monitors all operations of the gelatin analyzer. It works in color mode, the results are displayed on the panel. High temperature accuracy. We provide detailed instructions for setting up this model of the viscosity analyzer.

Before sending, the analyzers are tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. The price is indicated taking into account customs payments in Russia and delivery to the city of the client.
