Automatic machine for applying logo on tablets YS-01

DESCRIPTION

Automatic printer for printing on tablets, pills and capsules, chewing gum, candy, shell-covered nuts is designed to print characters on empty or filled capsules and tablets of any size and shape. The capacity is 50,000 pieces per hour. Weight 180 kg. It is compact in structure and simple in operation model. Printing can be carried out in one color on one side or in two colors on both sides. The printer is controlled from a single panel and is so easy to use that one operator can run several processes at the same time. Automatic, economical and easy to operate the machine is used in the medical, food and chemical industries.

We provide a full range of services: installation, training, start-up, repair. Complies with the GMP standard. We provide detailed instructions for setting up this model of the machine. Before sending the machine for labeling, machine is checked and tested in production. Completeness and working capacity is guaranteed. We maintain a stock of parts and consumables in the warehouse. The price is indicated taking into account customs payments in Russia and delivery to the city of the client.

ADDITIONAL INFORMATION

The printer is controlled from a single panel and is so easy to use that one operator can run several processes at the same time. The quality of printing at a low cost is very high. Outward, trademarks improve the quality of your products. All content can be fully printed on the product with our unique printing system for customer inquiries and orders. The design of removable parts makes it easy to replace them for another function. The printer produces high-quality printing from one or two sides, a two-sided printer must be adapted specifically for orders. Templates and all print content can be easily changed by replacing the gravure printing shaft. The design of the machine is made of stainless steel, which allows the use of detergents in the daily operation of equipment. The design is very stable.
